7	If user has permission of both modules from admin panel	User should get an option to choose any one module before re-directing to dashboard screen		Passed
8	User logs in as a trader	- User should be able to login as a registered user		Passed
9	User logs in as a trader	- User should lands on dashboard screen		Passed
10	User checks a dashboard	<div>- User should see following details on dashboard :<ul style="list-style-type: none">• Trade management• Training• Change module option• Notifications bell• App language icon• User profile icon</div>		Passed
11	User clicks on trade management tab	<div>User should see following tabs under trade management tab :<ul style="list-style-type: none">• Create trade• Trade list• Claim• Escalated trade• Contract list</div>		Passed
12	User clicks on create trade tab	Trade details page should get open to fill the trade details		Passed

13	User clicks on trade list	Trade list should get open on a new page		Passed
14	User clicks on claim tab	Claim list should get open on a new page		Passed
15	User clicks on escalated trade tab	Escalated trades list should get open on a new page		Passed
16	User clicks on contract list	Contract List should get open on a new page		Passed
17	User clicks on training	Training Videos should get open on a new page		Passed
18	User clicks on a change module option	If user has a permission of both modules then he/she should see options to switch between the modules		Passed
19	User clicks on app language icon	User should see 3 options - English, Chinese and Arabic		Passed
20	User selects Arabic	User should see app in arabic language and complete web page should be visible in right to left format		Passed
21	User selects Chinese	User should see app in chinese language		Passed
22	User selects english	User should see app in english language		Passed
23	User clicks on notifications bell	User should see a list of notifications with a badge count		Passed
24	User clicks on profile icon	User should see a log out button		Passed
25	User clicks on a log out button	User should get logout and redirected to login screen		Passed
26	User clicks on profile picture	<p>User profile should get open with details as :</p> <ul style="list-style-type: none"> • First name • Last name • Email • Phone • Time zone 		Passed
27	User updates profile details	User should be able to update first name, last name and timezone only		Passed
28	User clicks on sorting icons	Trade list should get sorted as per the sorting applied on any particular detail		Passed
29	User applies filter	User should get a desired result as per the filter applied		Passed
30	User clicks on activity button	- Activity logs page should get open		Passed
31	User clicks on activity button	-Activity logs should be generated for every action performed on trade		Passed
32	User clicks on remark button	Remark page should get open to add a remarks		Passed
33	User clicks on create trade option from side menu bar	Trade detail page should get open to fill the trade details		Passed
34	User checks the trade details page	<p>User should see following fields :</p> <ul style="list-style-type: none"> • Priority • Buyer ID* • Seller ID* • Trade Type* • Trade Date* • Destination Country* • Pay Conditions • Pay Term* • Container Load* • Save as draft button • Next button 		Passed
35	User clicks on save as draft button	The user should redirected to trade list with draft status and all details should get saved		Passed
36	User clicks on next button without filling the mandatory fields	User should get a validation error messages for mandatory fields		Passed
37	User clicks on next button after filling the mandatory fields	Shipment Details page should get open to fill the shipment details		Passed

38	User checks the shipment details page	User should see following details : <ul style="list-style-type: none"> • Shipment Month* • Port Of Loading* • Port Of Discharge* • Port Of Delivery • Contract Issued By (Issuer Name)* • Back and Next button 		Passed
39	User clicks on back button	Trade details page should get open		Passed
40	User clicks on next button without filling the mandatory fields	User should get a validation error messages for mandatory fields		Passed
41	User clicks on next button after filling the mandatory fields	Product Details page should get open to fill the Product details		Passed
42	User checks the Product details page	User should see following details : <ul style="list-style-type: none"> • Category* • Product* • Booked Quantity (MT)* • Price* • Origin* • Container Type* • No. Of Container* • Container Size* • Product Package • Add Note • Add more product button • Back and Next button 		Passed
43	User clicks on add more product button	New product page should get open to fill the product details		Passed
44	User clicks on back button	Shipment page should get open		Passed
45	User clicks on next button without filling the mandatory fields	User should get a validation error messages for mandatory fields		Passed
46	User clicks on next button after filling the mandatory fields	Seller Details page should get open to fill the Product details		Passed
47	User checks the Seller details page	User should able to see below fields: 1. Seller Name 2. Seller Commission 3. Branch Commission 4. Co Broker Name 5. Co Broker Commission 6. Seller email 7. CC email		Passed
48	User clicks on back button	Product details page should get open		Passed
49	User clicks on next button without filling the mandatory fields	User should get a validation error messages for mandatory fields		Passed
50	User clicks on next button after filling the mandatory fields	Buyer details page should get open		Passed
51	User checks the Buyer details page	User should able to see below fields: 1. Buyer Name 2. Buyer Commission 3. Branch Commission 4. Co Broker Name 5. Co Broker Commission 6. Buyer email 7. CC email		Passed
52	User clicks on back button	Seller page should get open		Passed
53	User clicks on next button without filling the mandatory fields	User should get a validation error messages for mandatory fields		Passed

54	User clicks on next button after filling the mandatory fields	Trade set off page should get open		Passed
55	User checks the trade setoff page	User should see trade position field box		Passed
56	User clicks on trade position field box	User should see 2 options as - New and Square off		Passed
57	User selects new	User should be able to select as new from a drop down list		Passed
58	User selects square off	User should get a Trade Id Squareoff field box		Passed
59	User clicks on Trade Id Squareoff	Drop down list should get open to select the Trade Id Squareoff		Passed
60	User clicks on back button	Buyer details page should get open		Passed
61	User clicks on next button	Review details page should get open		Passed
62	User checks the review details page	User should see all data filled in previous tabs		Passed
63	To Verify the following tabs are coming or not: Trade Details Shipment Product Details Shipper Details Buyer Details and trade setoff	<p>The Following Tabs should come in the listed order below:</p> <ul style="list-style-type: none"> • Trade Details • Shipment Details • Product Details • Shipper Details • Buyer Details • Trade setoff 		Passed
64	To Verify whether the data is coming properly in the below tabs or not: Trade Details Shipment Product Details Shipper Details Buyer Details and trade setoff	<p>The data should come properly as filled by trader in the below tabs:</p> <ul style="list-style-type: none"> • Trade Details • Shipment Details • Product Details • Shipper Details • Buyer Details • Trade setoff 		Passed
65	To Verify whether the trader is able to edit the data which is coming under the below tabs Trade Details Shipment Shipper Details Buyer Details and trade setoff	<p>The trader should be able to edit the data which is coming under the below tabs :</p> <ul style="list-style-type: none"> • Trade Details • Shipment Details • Shipper Details • Buyer Details • Trade setoff 		Passed
66	Product detail page is view only	Product detail page is view only and is not editable		Passed
67	To Verify the trader is able to see and use the following buttons - Back - Save as Draft - Next	<p>The trader is should be able to see and use the following buttons:</p> <ul style="list-style-type: none"> • Back • Save as Draft • Next 		Passed
68	User clicks on send button	A pop-up should open having Name and Email fields, when send button is clicked		Passed
69	To Verify the pop-up has following details in it: Name and Email ID field box	The pop-up should have following details in it : Name and Email ID field box with a send button on it		Passed
70	User clicks on Name field box	User should see a list of BDM's as a drop down list and user should be able to select any BDM user from the list		Passed
71	On selecting BDM from the drop down list	Email ID should get populated automatically		Passed
72	User clicks on send button	- User should get a successful message as "Trade is sent for approval"		Passed
73	User clicks on send button	- Trade should get sent to BDM user for approval		Passed

74	User clicks on send button	- Notification should be received by BDM user and IRM		Passed
75	User clicks on draft button	Trade gets saved as draft and user should get redirected to trade list		Passed
76	User clicks on back button	User should get redirected to previous trade setoff page		Passed
77	Activity log is generated when trade is created	Activity log should be generated when trade gets created		Passed
78	User opens the BDM login URL	User should be able to open the login screen with Email id and Phone number field box		Passed
79	User opens the BDM login URL	An option to change the app language		Passed
80	User is able to enter email in the email field	User should be able to enter email id in the email field		Passed
81	User enters valid Email ID and Phone number	User re-directed to enter OTP screen		Passed
82	User enters valid OTP in mobile and email field	User gets logged in to portal successfully		Passed
83	User enters valid OTP in mobile and email field	User lands on the Module Selection Screen		Passed
84	User checks language selection option on opening a web page	User should be able to select app language as - English, Chinese and Arabic		Passed
85	On selecting the preferred language	User should be re-directed to login screen and screen should display as per the language selected		Passed
